CHOOSE A PATH THAT INCLUDES MATH!

LCVI Cafetorium

HOW PARENTS CAN SUPPORT MIDDLE SCHOOL STUDENTS IN MATHEMATICS

How can parents contribute to increased motivation, build persistence, support the transition into a more independent educational experience, and prepare their children for future success? This session will explore the ways that parents of students in middle school can support math learning at home and help with decision-making about math course selections for secondary school

Dr. Lynda Colgan
 Professor, Mathematics Education
 Queen's University

Did you know that fewer than 50% of students in Canada graduate with a Grade 12 math credit?

Did you know that as a consequence the 50% without Grade 12 math are excluded from between 60% and 75% of all programs at community college and university?

Thursday, April 19th at 6:30pm

LCVI Cafetorium
 153 Van Order Drive
 Kingston, Ontario
